PROFILE

AI/ML Engineer with ~10 months of internship experience working on real-world GenAI and data engineering use cases. Hands-on experience in RAG pipelines, LLM evaluation, NLP-to-SQL systems, and ETL workflows, with a focus on building and optimizing scalable GenAI systems while improving latency and reliability. Proficient in Python, SQL, Snowflake, and Azure OpenAI, seeking full-time AI/ML engineering roles to build and deploy production-grade AI systems.

EDUCATION

Master of Technology (M.Tech.), Computer Science with AI and ML 2024 - 2026
Vellore Institute of Technology, Vellore — CGPA: 9.07 Vellore, India

Bachelor of Technology (B.Tech.), Computer Science with AI and ML 2020 - 2024
Jawaharlal Nehru Technological University Hyderabad — CGPA: 7.97 Hyderabad, India

SKILLS

Languages:	Python, SQL, Java
Core CS:	Data Structures, Algorithms, OOP, DBMS, Operating Systems
AI/ML:	Machine Learning, NLP, Large Language Models (LLMs), RAG, Prompt Engineering
Libraries/Frameworks:	Pandas, NumPy, Scikit-learn, FastAPI, Flask, Hugging Face, PyTorch
Data & Cloud:	ETL, Data Pipelines, Snowflake, Azure, AWS, Docker
Tools:	Git, GitHub, Jupyter Notebook, Azure OpenAI, DeepEval

PROFESSIONAL EXPERIENCE

Data Science Intern, PowerSchool India Jul 2025 – Present

- Designed and implemented an **LLM Evaluation Pipeline** to assess responses across accuracy, relevance, hallucination, and reliability metrics; benchmarked multiple models and optimized performance by adopting **Snowflake Cortex (Claude 3.5)**, achieving **40% lower latency** with improved response consistency compared to general-purpose GPT models.
- Improved semantic search, resolved UI issues, and implemented backend API changes during the migration of the **NLP-to-SQL (PowerBuddy for Data Analysis)** platform from **Snowflake to AWS**, enabling secure natural language analytics across datasets representing **60M+ students globally**.
- Owned ETL workflows and data cleanup pipelines using **Python, SQL, Snowflake, and Azure**, standardizing datasets for the **PowerSchool Essentials** migration, reducing batch runtime from **30 to 5 minutes**.
- Built a RAG-based **AI Help Assistant** using **hybrid search** (keyword + semantic retrieval) with **Azure OpenAI text-embedding-3-large** for vector embeddings and **GPT-4o** for response generation, enabling accurate and reference-backed answers for educators and students.
- Identified and resolved a prompt injection vulnerability in the **PowerBuddy for Learning** chatbot by implementing **regex-based input validation** and hardening system prompts, eliminating system prompt leakage risk in a live production **GenAI application**.

PROJECTS

- AI-Powered Narrative Analysis & LLM Chatbot System:** Developed a conversational AI system for domain-specific text understanding using transformer-based language models. Performed preprocessing, named entity recognition, and model fine-tuning for text classification, achieving **85% accuracy**. Built interactive dashboards using **Gradio** and **React** for real-time user interaction and model output exploration.
- MBTI Personality Classification using BERT and PPO:** Fine-tuned a **BERT-based Actor-Critic model** using **PPO** for 16-class MBTI classification on chat text, implementing advantage estimation and clipped surrogate loss, achieving **83% accuracy** vs **65% with traditional supervised methods**.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **500+ DSA problems** on **LeetCode** and **GeeksForGeeks** —[LeetCode Profile](#)—
- Completed the IBM AI Engineering Specialization and earned a MongoDB badge for AI-powered search
- Led a team of 5 students to organize a Technical Fest, managing logistics and engagement.
