PROFESSIONAL SUMMARY

AI/ML Engineer with 1+ year of experience developing AI-powered applications, Generative AI solutions, and backend systems. Experienced in building LLM evaluation frameworks, NLP applications, and AI-driven workflows. Proficient in Python and SQL, with hands-on experience in REST API development, data pipeline optimization, cloud technologies, and LLM integration.

EDUCATION

Master of Technology (M.Tech.), Computer Science with AI and ML 2024 - 2026
Vellore Institute of Technology, Vellore — CGPA: 9.33/10 Vellore, India

Bachelor of Technology (B.Tech.), Computer Science with AI and ML 2020 - 2024
Jawaharlal Nehru Technological University Hyderabad — CGPA: 7.97/10 Hyderabad, India

TECHNICAL SKILLS

Languages: Python, SQL, C/C++
Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems
GenAI & NLP: LLMs, RAG, MCP, AI Agents, Prompt Engineering, NLP, Transformers
ML: Machine Learning, Deep Learning, Model Evaluation
Frameworks & Libraries: FastAPI, LangChain, PyTorch, Scikit-learn, DeepEval, spaCy, Hugging Face
Cloud & Data: GCP, AWS, Azure OpenAI, Snowflake, AlloyDB, Docker, Vector Databases
Tools: Git, GitHub, CI/CD, Jupyter Notebook

PROFESSIONAL EXPERIENCE

AI Python Intern, Techolution Jun 2026 – Present
Hyderabad, India

- Developing an executive dashboard for the **Data Ingest AI** platform to track **CPU, memory, Redis, and AlloyDB metrics**, with integrated alerting for proactive infrastructure monitoring.
- Building and integrating **Python-based REST APIs** for metrics collection, alert management, and backend functionality across the platform.
- Contributing to the **AI Widget Maker** project by building AI-powered enterprise widgets from business requirements using **Python and LLMs**, while exploring **AI agents** and workflow automation.

Data Science Intern, PowerSchool Jul 2025 – May 2026
Bengaluru, India

- Designed and implemented an **LLM evaluation framework** using **DeepEval** to assess response accuracy, relevance, and hallucinations. Benchmarked models and adopted **Snowflake Cortex (Claude 3.5)**, achieving **40% lower latency** and improved response consistency.
- Enhanced **semantic search and NLP-to-SQL workflows** in the **PowerBuddy for Data Analysis** platform during its migration from **Snowflake to AWS**, contributing to backend APIs and secure analytics across datasets associated with **60M+ users**.
- Built and optimized **ETL pipelines** using **Python, SQL, Snowflake, and Azure OpenAI** for batch AI processing, reducing execution time from **30 minutes to 5 minutes (83% reduction)**.
- Identified and mitigated a **prompt injection vulnerability** in the **PowerBuddy for Learning** chatbot using **Guardrails AI**, input sanitization, and prompt hardening, reducing prompt injection occurrences from **20% to 0%** and preventing prompt leakage in production.

PROJECTS

- Anime NLP Analytics Platform** – Subtitle and Character Intelligence : Built a domain-specific NLP application for anime subtitle analysis using **Transformer-based models, spaCy NER**, and text-classification pipelines. Implemented subtitle preprocessing, **zero-shot theme extraction**, and **character relationship graph generation**. Developed a chatbot for Naruto-related content and integrated the NLP capabilities into an interactive **Gradio** interface for text-based analysis.
- MBTI Personality Classification using BERT and PPO**: Developed a 16-class MBTI text classification model using a **BERT-based actor-critic architecture** optimized with **Proximal Policy Optimization (PPO)**. Built a structured training and evaluation pipeline, achieving **83% accuracy** compared to **65% with the supervised learning baseline**.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **500+ Data Structures and Algorithms problems** on [LeetCode](#) and [GeeksForGeeks](#).
- Completed the **IBM AI Engineering Specialization** and earned a **MongoDB badge** for AI-powered search.
